

Material data sheet

<p>name of product: insole CARBON universal</p> <p>article number: 221075</p> <p>ean code: 8586005030508</p> <p>size range: Universal – cutting design</p> <p>knife: universal</p> <p>package: cards + PP bags</p>	
--	---

Composition of material:

Textile: Viscose 100% with a weight of 110 gr./m²

Coating: Non gel latex foam with 220 gr/l^t of density and a weight of 750 gr/m², 3,5mm thickness, with addition of **active charcoal 5%**.

Treatment: Perforation mini

This product is free of Azofarbstoff, Formaldehyd, Pentachlorophenol, Nickel, Cadmiun and meets the standard law 76/769/CEE.

This product do not contain heavy metals and their components (SBR rubber and cellulose acetate as textiles component) have in outdoor exposition fast evolution to shall molecular size hydrocarbon structures able to biological degradation.

Insole CARBONE:

Cutting out, anti smell insole for everyday use. A perforated combination of PES textile (1) and latex foam with an addition of activated carbon (2) is airy and has excellent deodorant properties. The required insole size will be obtained by cutting it out along the marked line on the bottom side.

Reccomendation for insoles:

It is recommended to take the inner insole out of the footwear after each usage and let it dry. A regular exchange of insole guarantees your feet hygiene and prolongs the footwear service life. Before use, test whether it is sufficient to place the new insole on the old insole in the shoe or whether it is necessary to remove the old insole.
