Fisa Produsului

Cod Produs: 1962

Denumirea: Spray spuma de stingere a incendiilor, 600ml, 1 bucata

Marca Comerciala: ROMTEC Austria

Marimi: 600ml

Caracteristici: Sprayul de stingere a incendiilor este un recipient sub presiune de tip aerosol, de unica folosinta, care genereaza la punerea in functiune o spuma extrem de fina, stabila si persistenta, care acopera repede focarul, impiedicand contactul acestuia cu oxigenul atmosferic ce intretine arderea.

Lichidul rezultat in urma spargerii spumei raceste suprafetele, impiedicand reaprinderea acestora. Agentul propulsor utilizat este azotul.

Sprayul de stingere a incendiilor se utilizeaza in incendii incipiente, de mici dimensiuni, la focare de tip A (solide combustibile) si tip B (lichide combustibile), respectiv in incendii auto (provocate de instalatia electrica, carburant), in gospodarie si camping (datorate aprinderii produselor textile, hartiilor, lemnului, uleiurilor, solventilor, jaratecului, s.a.).

Instructiuni de folosire: Sprayul de stingere a incendiilor de unica folosinta, care genereaza o spuma fina.

EN

Product Data Sheet

Product Code: 1962

Name: Spray foam fire extinguisher, 600ml, 1 piece

Commercial Mark: ROMTEC Austria

Sizes: 600ml

Characteristics: The fire extinguishing spray is a disposable aerosol pressure vessel that generates an extremely fine, stable and persistent foam when put into operation, which quickly covers the hearth, preventing its contact with the atmospheric oxygen that maintains the combustion.

The liquid resulting from the foam breaking cools the surfaces, preventing them from re-igniting. The propellant used is nitrogen.

The fire extinguishing spray is used in incipient fires, of small dimensions, at fires of type A (combustible solids) and type B (combustible liquids), respectively in car fires (caused by the electrical installation, fuel), in the household and camping due to the ignition of textiles, papers, wood, oils, solvents, embers, etc.).

Instructions of use: Disposable fire extinguishing spray, which generates a fine foam.
