

USER INSTRUCTIONS

ARTICLE CODE: 1541G

Protection category: II

DESCRIPTION: leather glove made with palm of goatskin, back trinda fabric, with leather index finger, piping at cuff, leather thickness 0.7-0.9 mm stitched with polyester thread.

AVAILABLE SIZES: 7,8,9,10,11

USE: the gloves are designed to be used in work environments that require light mechanical protection. The gloves are only suitable for workplaces where the risks in the user's wrist area have been assessed and considered negligible. These gloves correspond to the indicated technical standards. Remember that real conditions cannot be simulated, therefore it is the user's responsibility and not the manufacturer's to determine the quality of the gloves and their suitability for the intended use.

A risk assessment to determine whether these gloves are suitable for the intended application should take place prior to use.

TECHNICAL DETAILS: the EU type examination is performed by the Notified Body MIRTA-KONTROL d.o.o., Javorinska 3, HR-10040 Zagreb-Dubrava, Croatia (No. 2474), in accordance with EU Regulation 2016/425.

Tested in accordance with EN 388:2016+A1:2018 and EN ISO 21420:2020.

Test results against mechanical risk as per EN 388:2016+A1:2018:

Symbol	Performance Levels	Assessment	Level 1	Level 2	Level 3	Level 4	Level 5
EN388:2016+A1:2018  2122X	Abrasion resistance (Cycles)	2	100	500	2000	8000	
	Blade cut resistance (Index)	1	1.2	2.5	5.0	10.0	20.0
	Tear resistance (Newton)	2	10	25	50	75	
	Puncture resistance (Newton)	2	20	60	100	150	
	TDM Cut (Newton)	X	A >2, B >5, C >10, D >15, E >22, F >30				

The test results are only applicable in the palm of the glove.

X = not tested

PRECAUTION FOR USE: never use these gloves with chemicals or allow them to be exposed to any chemicals. Do not use if there is a risk of entanglement with moving machinery or moving machinery parts. Before use, inspect the gloves for any defects or imperfections and avoid wearing damaged, heavily soiled, worn or dirty (also internally) glove or presence of any substance, that could irritate and/or infect the skin.

CLEANING AND MAINTAINANCE: both new and used gloves must, especially after they have been cleaned, be carefully reviewed before wearing them, to ensure that no damage is present. Gloves should never be kept in dirty state when they should be used again. In this case, the gloves should be cleaned before taken off as much as possible, provided that no serious danger.

STORAGE: store the gloves in their original packaging in a cool and dry place. Keep away from direct sunlight, heat, flame and sources of ozone. Put the gloves on dry and clean hands.

DISPOSAL: if used gloves may be contaminated with infectious or hazardous substances, dispose of according to the local Authority/Municipality Regulations, landfill or incinerate under controlled conditions. In most matters the gloves can be disposed of normal garbage cans.

ALLERGIES: allergies caused by the proper use of gloves are not yet known. Nevertheless, if an allergic reaction should occur seek medical advice immediately.

OBsolescence: when stored according to the recommendations, the gloves will not change their mechanical properties for up to 3 years from the date of manufacture.

Declaration of conformity may be assessed at the following address : <https://magazin.renania.ro/>
