GB - Instruction to User:

This pair of protective eyewear meets EN 166:2001 standard for Personal Eye protection and applicable basic health and safety requirements of the Regulation (EU) 2016/425 of the European Parliament.

USING THIS EYEWEAR

Always check with your supervisor or safety officer to confirm that the protection offered by this pair of eyewear adequate production for your work environment.

These spectacles offer protection against high speed low energy particles at extremes of temperatures.

They are Class 1 optical and can be worn long term in a normal working environment.

These spectacles can be provided with UV protection filters. These spectacles can be provided also with filters specific for sun glare protection for industrial use, for tropics and sub-tropics, for observation of the sky, for use in high mountain regions, snow covered areas, bright stretches of water, sandy plains, chalk and limestone quarries. These oculars are not suitable for direct observation of the sun (e.g. during eclipses).

WARNING

- This pair of eyewear offers no protection against IR radiation and thus should not be used as primary protection in environments where dangerous levels of IR radiation are present, for example where welding operations are carried out or the casting of molten metal.
- If protection against high speed particles at extremes of temperature is required then the selected eye-protector should be marked with the letter T immediately after the impact letter, i.e. FT, BT or AT. If the impact letter is not followed by the letter T then the eye protector shall only be used against high speed particles at room temperature.

- If the symbol F, B & A are not common to both the oculars and the frame then it is the lower protection type which shall be assigned to the complete eye protector. For an eye protector to comply with field of use symbol 9 both the frame and ocular shall be marked with the 9 symbols together with one of the symbols F, B or A.
- Whereas this pair of eyewear offers adequate UV protection against UV sun radiation they should not be used in any environments where there are hazardous levels of UV radiation present, such as in UV curing operations.
- Clear eyewear offers no protection against sun glare.
- Check the eyewear regularly for noticeable scratching, pitting or any other damage to the lens. Scratching, pitting, or other damage to the lens can seriously reduce the level of impact protection provided by the product. Such product be immediately be discarded and replaced.
- No parts on this eyewear are replaceable or interchangeable
- If any part of the eyewear is deemed unfit for use then the whole product should be discarded.

PRODUCT MARKING

The product has markings on the front faceplate and on the temples, which represent the performance of the product and suitable field of use

Temple marking: CE REN EN166 FT)

Lens marking:

Clear	2C-1.2 REN 1 FT)
Smoke	5-3,1 REN 1 FT)
Yellow	2C-1.2 REN 1 FT)

EXPLANATION OF MARKING:

CE	CE logo
REN	Identification of Renania Trade SRL
2C-1.2	Scale number - UV filter
5-3,1	Scale number – Sun glare filters for industrial use
1	Optical class
FT)	High speed impact resistant- low energy particles (at extremes of temperatures)
EN166	Number of the standard

GENERAL INSTRUCTIONS:

- This product is not supplied with any accessories.
- It is advised that you kept this eyewear in a protective bag or box when not in use or during transport.
- Maximum product life is 2 years.
- Whereas the material used in the constructing of this product has been deemed hypo-allergic it is still possible there may be some allergic reaction experienced by susceptible people. The user should check for any such reaction and cease use of product if any reaction is observed.

STORAGE:

Spectacles should be stored at temp above 5C and below 40C, RH < 90% and kept away from solvents, or solvent vapours or any corrosive materials, as these may seriously reduce the impact protection provided by the spectacle.

CLEANING

These spectacles can be cleaned with soap and warm water or if required disinfected with a UV lamp or cleaned with a common domestic disinfectant. Whereas the lenses are hard-coated to provide a certain level of scratch resistance, they are not scratch proof and it is recommended that wiping of lens be kept to a minimum and only done so with a soft non-abrasive cloth.

This PPE is EU type approved by:
